SUMMARY

Solution Architect with 5+ years designing and delivering Data & AI platforms across Energy, Banking, Insurance and Retail. Deep expertise in Azure Data services, Data Mesh, MLOps and cloud-native data platforms. Proven track record leading architecture sessions, driving POCs to production and translating technical solutions into measurable business value.

EXPERIENCE

Solution Architect

Quantyca S.p.A. - a Jakala company

📅 June 2025 – Present 📍 Monza, Italy

- Led end-to-end Data & AI architecture design for 3 enterprise clients (Energy, Insurance, Appliances), translating business priorities into scalable Azure or AWS based solutions aligned with Data Mesh principles.
- Designed Data Product sizing, platform capabilities and Sidecar services for an energy client; **100+ users** onboarded on the Data Mesh Experience Plane.
- Drove Data Strategy roadmap: authored Lean Value Tree, defined Measures of Success, coordinated Federated Governance Community across business and IT stakeholders.
- Tech guide for 2 delivery teams (**15 developers**) across governance, platform and product development streams; co-designed AI agent-based solutions.
- Design and guide of data quality frameworks and deployment gates, reducing release risk and enforcing naming standards across teams.
- Tech assessment on a US customer (brewery) which led to an implementation project for an Azure Event Hub based data platform solution

Data Architect

📅 February 2023 – June 2025 📍 Monza, Italy

- Architected and delivered a Data Hub for the Save & Invest banking domain using Medallion Architecture and Data Mesh principles on Kafka, Spark and Apache Iceberg.
- Maintained and evolved an MLOps platform serving **100+ data scientists**: JupyterHub, Kubernetes, MLflow, GitLab, ELK — including hardening, upgrades and online model serving.
- Established CI/CD and IaC foundations on AWS; implemented Lake Formation with TBAC for centralised access management.
- Technical reference across multiple workstreams; drove architectural proposals for AML, Data Governance and Data Mesh in banking contexts.

Senior Data Engineer

📅 February 2022 – January 2023 📍 Monza, Italy

- Migrated a third-party AI blackbox solution (4 use cases) onto bank infrastructure, saving **45 FTEs** reallocated to higher-value activities.
- Led Data Science platform evolution: HA hardening, test environment, online model serving — team of 3 serving 100+ data scientists.
- Delivered AWS Datalake with multi-supplier data ingestion for a sports client (S3, Glue, Athena, Step Functions).

Data Engineer

📅 December 2019 – January 2022 📍 Monza, Italy

- Designed legacy off-loading architecture with Kafka + Debezium CDC for a transport client, meeting contractual SLA of **<5 min** end-to-end latency.
- Built ELT pipelines and relational data marts for retail DWH;

EDUCATION

B.Degree & M. Degree in Telecommunication Engineering

110 cum laude

📍 Politecnico di Milano

ACHIEVEMENTS

- 🏆 **Certified Kubernetes Administrator (CKA)**
The Linux Foundation, 2023
- 🏆 **International team**
Selected as head of Quantyca's International Team, 2026
